

CHAHAT DHAKAN

MERN STACK WEB DEVELOPER

9429917026 | chahatdhakan4@gmail.com | linkedin.com/in/chahat-dhakan

Summary

Final-year Computer Engineering student with a strong foundation in Business Analysis, Data Analytics, and full-stack web development using the MERN stack (MongoDB, Express.js, React, Node.js). Proficient in SQL, Python, and Power BI for data analysis, visualization, and reporting, with hands-on experience in requirement gathering, stakeholder communication, and documentation. Experienced in building end-to-end web applications and applying data-driven approaches to improve user experience and support business decision-making. Additionally, holds a minor specialization in Electric Vehicles with solid knowledge of Battery Management Systems, enabling a unique combination of software development, analytics, and domain expertise.

Education

- B.Tech, Computer Engineering — Madhuben And Bhanubhai Patel Institute Of Technology, Anand (2023–Present)
- B.Tech Minor In Electric Vehicles – A.D.Patel Institute Of Technology

Technical skills

- **Data & Analytics:** SQL (Joins, Aggregations, Data Validation), Python (Pandas, NumPy, Matplotlib), Power BI (Dashboards & Reporting), Excel (Pivot Tables, Charts).
- **Programming Languages:** Python, JavaScript
- **Web Development (MERN Stack):** MongoDB, Express.js, React.js, Node.js
- **Tools & Methodologies:** Jira, GitHub

Projects

Dock to Door – Farm-to-Consumer Web Platform (MERN Stack)

- Built a full-stack web application enabling direct delivery of food products from farmers to consumers.
- Developed features for product browsing, ordering, and user management using MongoDB, Express.js, React, and Node.js.
- Focused on simplifying the supply chain and improving access to fresh farm products.

IoT-Based Temperature Detector

- Developed a temperature monitoring system using sensors and microcontrollers.
- Collected and displayed real-time data for environmental monitoring applications.

Bluetooth-Controlled Car with Battery Management System

- Designed a Bluetooth-controlled car using ESP32 for wireless control.
- Integrated OLED display and INA219 sensor for real-time battery monitoring.
- Implemented basic Battery Management System concepts for performance and safety.

Certificates

- *C-LANGUAGE FROM APTECH*
- *MERN Stack Development Certification - Udemy*
- *Data Analysis Certification (SQL, Python, Power BI) - Udemy*

Extracurricular activities

- Core Team Member, ISTE Committee – Contributed to organizing technical events and student engagement initiatives.
- Core Committee Member, Personality Development Cell – Assisted in conducting workshops and activities to enhance student soft skills.
- Training & Placement Cell Coordinator – Supported placement drives, coordinated with recruiters, and managed student communications.
- NSS Volunteer – Participated in community service activities and social initiatives.
- Secured **2nd Position** in an Inter-College Competition.
